

# Analog Progressive Scan Accessories

## Software CD-ROM

This is the CD-ROM containing communications software for Sentech analog progressive scan cameras. As the CD-ROM is not included as standard with products, customers requiring the software should contact the Sentech sales department.

Name	Supported Models	Category	Supported OS	Date Updated
StCtrl2	All analog progressive scan cameras	Communications and Various Setting Modification Software	XP SP2 or later/Vista/Win7	-

## Power Supply

The camera inputs and outputs video signals and electrical signals through the same 12-pin connector. Therefore, a separate junction box which separates and relays the video signals and electrical signals between the camera and a board is required. Please consult with our sales department.

Model No.	Supported Models
junction box	All analog progressive scan cameras

## Tripod mount

Optional adapter for fastening the camera with tripod screws.

Model No.	Supported Models
TP-HCA	All analog progressive scan cameras
